

1. Get your 80° Engraving Tool and click "Change" to tell the software you will be using this tool.
2. Measure your dog tag and enter the value here.
3. Measure your tape and enter the value here.
4. Place dog tag on the spoilboard.
5. Click "Open File". Select the SVG file.
6. Deselect "Cutout" by clicking it. It will turn light gray when deselected.
7. Set "Engraving Depth" to 0.003"
8. Select 80° Engraving Tool
9. Change "Scale From" to "Document Bounds"
10. Look at the Preview.

Things to Note:
 This is the preview of what will be milled. Red marks won't be milled, but that's okay because we don't want to mill those areas.
